How to Properly Dispose of STERRAD® 100NX Cassettes

The STERRAD® 100NX System's cassette disposal box (20227) can hold up to 2 cassettes before it must be replaced. Please follow the instructions below to safely dispose of your cassettes.

As a precaution, when handling any part of the system or load items that have been exposed to hydrogen peroxide, please wear the appropriate PPE (chemical resistant latex, PVC/vinyl, or nitrile gloves). Refer to the glove manufacturer’s instructions for use for more information.

For safety reasons, you must use the cassette disposal box to dispose of cassettes. Never reuse a cassette disposal box.

1. Remove
Open the cassette access door.
Pull the tab on the cassette disposal box to more easily slide it completely out.

2. Close & Dispose
Close the lid by pinching it shut along the edge.
Dispose of the closed cassette box according to your facility’s policy.

3. Replace
Insert a new box making sure the lid is open and the tab is facing toward you.
Close the access panel.

Never reuse a cassette disposal box.

To order STERRAD® 100NX Cassette Disposal Boxes (20227), please contact an ASP Representative or your local distributor.
